Programming Instructions for VP-4AW

1. Enter the program mode: Press and hold the "Shift Left" and "Shift Right" keys for 2 seconds simultaneously. The LCD will then display "0000" (Password, 0000 is the default password). Input the correct password by using "Shift Left/Shift Right" key and "Function" key. Then press the "Ready" key into the main program menu screen as shown below:

"ADLVSYLGSBQT"

AD: Pager Capcode Setting
LV: Testing Only
SY: System Parameter Setting
LG: Power On LCD Display Setting
SB: Reserved (Not in use now)
QT: Save & Quit

2. Use the "Shift" key and "Function" key to select and set "AD", then the LCD will display as shown below:

"A: 1234567 B"

A: Number of Capcode 1 to 6
1234567: Pager Capcodes
B: Message Receiving Type
(0) --- Normal Message
(1) --- Mail Drop (Public) Message

After capcode setting, press the "Read" key to return to the main program menu screen.

3. "LV" is the software self testing function only.
4. Use the "Shift" key and "Function" key to select and set "SY", then the LCD will display 19 digits as shown below:

"ABCDEFGH I X J
K LMNO PQRS "

DIGITS FUNCTION

A	Signal Polarity	0---Normal (20.945 MHz) 1---Inverse (21.855 MHz)
BC	Reserved	00---Default
D	Key Tone	0---Disable 1---Enable
E	Unread Alarm	0---Disable 1---Enable
F	Reserved	0---Default
G	Reserved	1---Default
H	Stand-by ICOM	"o" on the LCD 0---No "o" ICOM 1---with "o" ICOM
I	Sequential Lock Out Time	0---Disable 1 to 9---1 to 9 minutes
J	User Language Selection	0---Mandarin Chinese 1---English 2---Simplified Chinese 3---Russian
K	BPS, 0-512, 1-1200, 2-2400	
LMNO	Function Bit 0~3	0---Numeric Only 1---Canned Chinese Message 2---Taiwan CNS 3---Russian or English 4---GB2312, China
PQRS	Four Digit Password Setting	0000 to 9999
X	Add "Space" to the first character of received message	0---No space 1~9---Add 1~9 "Space"

Then press the "Read" key to return to the Main Menu Screen.

5. Use the "Shift" key and "Function" key to select and set "LG". You can set 16 characters to be the power on logo. (The first 16 characters of any message in the pager's memory can be set as power on logo.) First, select the correct message in the pager's memory. Then go into the programming procedure and select function "LG" to set this message as the power on logo (first 16 characters). Then press the "Read" key to return to the program menu screen.
6. Use the "Shift" key and "Function" key to select and set "QT". Save parameters and quit this program.
7. END
